MACFRUT Live: LADY LEAF, endives in salad for every occasion

The LADY LEAF stand is a colorful debauch and a pleasure for the eyes, offering a new range of individual salads, light and tasteful, very "healthy food".

True "health" snacks, these salads offer an innovative blend, endives with cashew nuts and cranberries, or olives and dried fruits. Individually packaged with protective film.

Always involved in the evolutions of fresh, SOC. AGRICOLA FORNARI, whose core business for 40 years is endive, launches its LADY LEAF SNACK range - a result of careful study - to meet the needs of those who want a delicious, healthy, light and balanced snack and without preservatives.

It's no coincidence that LADY LEAF SNACK won the silver medal at MACFRUT 2017 INNOVATION AWARD.
